

Royal Spas Model / Knight

The Knight is a great compromise between price and comfort. Underwater lighting will set your mood for relaxation, while each hydrotherapy jet sends warm water to comfort, caress, or stimulate the body. This is a great spa to go into a room since it can be taken through most exterior doorways without any modification to the doorway. But whether you use it indoors or on your patio, you're sure to love the Knight. The Knight offers 1 lounger and the additional room for up to 4 other adults.
