

Royal Spas Model / Princess

The Princess is perfect for one, two or three people. This spa has one of the most comfortable loungers found in any spa. The lounge seat has four double pulsating jets for your upper and lower back and a bigger than life storm jet for the middle of your back. This lounge also offers two air jets for your calves and two hydrotherapy jets for the bottom of your feet. In the bucket seat next to the lounge, there are two palm jets to offer therapy if you suffer from carpal tunnel problems or arthritis in your hands. With 28 jets, this spa packs quite a punch. If you are looking for the true hydrotherapy experience, then welcome to the Princess. With plenty of foot jets, calf jets, and even palm jets to massage you, its no wonder the Princess is rated as "Awesome" by existing Royal Spa customers.
