

## Royal Spas Model / Royale

The Royale features a luxurious lounge along one side and a deep bucket seat that is ergonomically molded to cradle your body in comfort with plenty of precision jets for your back and double pulsating jets for your feet. The bucket seat also offers 2 jets for those that suffer from carpal tunnel syndrome. With a total of 42 jets powered by 3 individual pumps, the Royale, like all Royal Spa Models, is powerful and still remains the most energy efficient spa in the industry. The Royale offers a sturdy grab rail above the lounge to help you maneuver in and out of the lounge. And not to leave out the little ones, the interior step offers a great cool down spot or child's seat so that your whole family enjoys quality time together.
